Venture into the innovation !

June 2021

The Japan Printing Machinery Association and the Japan Association of Pre-Press & Digital Printing Systems Suppliers are going to hold IGAS2022 (International Graphic Arts Show) at Tokyo Big Site for five days from November 24 (Thurs.) to November 28 (Mon.), 2022.

The Japanese economy is in a severe situation with the spread of COVID-19 infection and the resulting worst plunge in economy since the end of WWII. Although the dissemination of vaccines and medications for COVID-19 is expected, which is a bright omen, the situation is still unpredictable. While the impact of the spread of COVID-19 infection on the printing industry has also become enormous, the industry must respond to such a drastic change in environment. In light of this, the theme for the upcoming IGAS2022 was determined as "Venture into the innovation!" . It reflects a hope for resolutely making an attempt for new innovation without fearing for failure by taking a crisis as the greatest opportunity for change.

IGAS2022 proposes changes in the latest technology, services, solutions in printing and crossmedia, etc. and the creation of new business through such changes as well as provides venues for active business meetings. Above all, it is intended to be an exhibition which presents the new state of the printing industry that has overcome COVID-19 to Japan and the other parts of the world.

Specifically, in the "PANEL DISCUSSION & SEMINAR" part of the exhibition, events such as panel discussions and seminars will be held under various topics, including digital transformation and smart factory, and from brand owners' perspectives. Topics will be taken up that are directly linked to business including the trend of the latest printing technology as well as marketing, new business, etc. related to printing. In the "TOUR" part of the exhibition, guided tours of the show floor will be conducted for several thousand visitors. Tours will be planned for various categories and topics. Tour routes will be provided that enable visitors to have a bird' s eye view of the outline of the whole exhibition halls. Those tours will provide perfect opportunities for exhibitors to advertise their products, technologies, and services. In the "THEME ZONE " part of the exhibition, IGAS2022 will set up a theme zone, where exhibitors covering cutting-edge topics and those falling under nonconventional categories are located, and a collaboration zone, where multiple exhibitors jointly give presentations under a single topic.

Exhibitor applications will be accepted from June 9 (Wed.), 2021 to March 18 (Fri.),2022.Your exhibition fee will be discounted if you apply by January 21 (Fri.), 2022.

Please refer to this brochure for the exhibition rule and the application procedure. We are looking forward to your application.
